

April, 2020

The coronavirus (COVID-19) continues to impact our community and poses a heightened threat to the health of vulnerable populations. At 21 Acres we continue to concentrate on prevention and preparation, focusing on precautions to limit the spread of the disease. For information on protecting yourself, your family and your business, we encourage you to read the health updates provided by the CDC and King County Health Department.

This is a rapidly changing situation and our approach will adapt to the conditions as they evolve. We will do our best to communicate updates via social media, our website and signs posted on campus. As we evaluate our day-to-day activities, we appreciate your understanding and support.

Campus is currently closed to all visitors and volunteers, with the exception of shoppers and deliveries in the Farm Market. The Farm Market will continue to stay open and we'll assess the situation on a day-by-day basis. We are committed to supporting farmers and serving an important food access role.

To be helpful to our community, customers can pre-order personal shopping for those who want to pick up food outside the Market. If you're interested in knowing more about this, [please follow this link](#).

Please know that we are carefully following recommended public health protocols and making some operating changes. On top of our daily cleaning schedules, we continue to follow an aggressive cleaning regimen – sanitizing spaces regularly, including areas such as the Farm Market. We have cancelled all events through the end of April and will re-evaluate next steps in the coming weeks. All staff are being screened for symptoms of the coronavirus each day and being careful to not come to work if they are at all concerned.

As always if you have any questions please do not hesitate to contact us, generalinfo@21acres.org. We've been grateful for all of the support from everyone over the years. We are proud to provide a place for you to experience farming, enjoy wetland and wild spaces, and get fresh food from nearby farms.
